INTRODUCTION

Welcome to the User Manual for the Tasu Chart program. This program allows you to connect to a database, generate charts and export them as pdf.

EXPLANATION OF GUI

1. LOG IN

Enter the user of the database. Then, enter the password, click the "Login" button and if the login is successful, you will be able to see the next panel with tables. Finally, if everything is correct you will see a notification panel that confirms a successful connection.

2. Select the type of graph

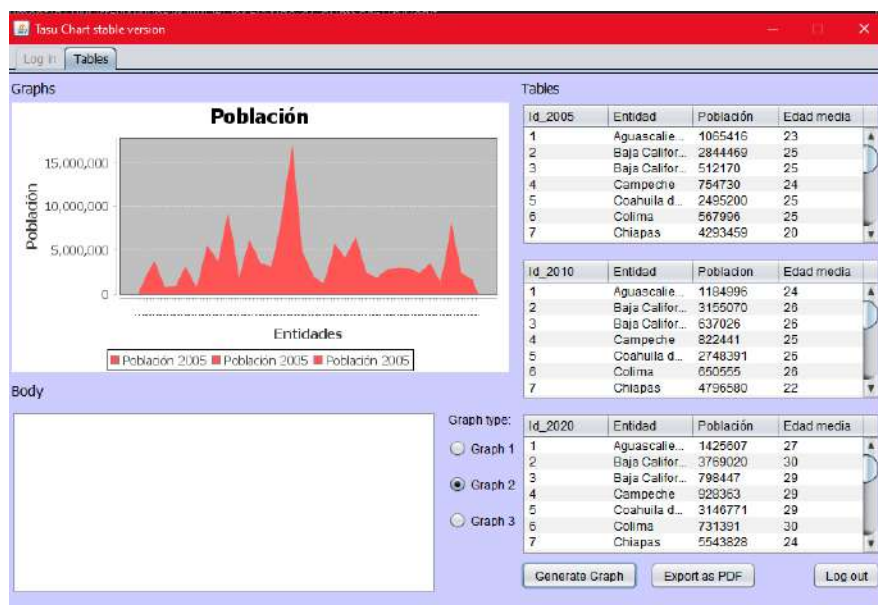

The screenshot shows the 'Tasu Chart stable version' window. The 'Tables' tab is active, displaying three tables of data. The 'Graphs' area is empty. The 'Body' area is also empty. The 'Graph type' section shows three radio buttons: 'Graph 1' (selected), 'Graph 2', and 'Graph 3'. A blue arrow points to the 'Graph 1' radio button. Below the 'Graph type' section are buttons for 'Generale Graph', 'Export as PDF', and 'Log out'.

| Id_2005 | Entidad | Población | Edad media |
|---------|----------------------|-----------|------------|
| 1 | Aguascalientes | 1065416 | 23 |

| 7 | Chiapas | 5543828 | 24 |

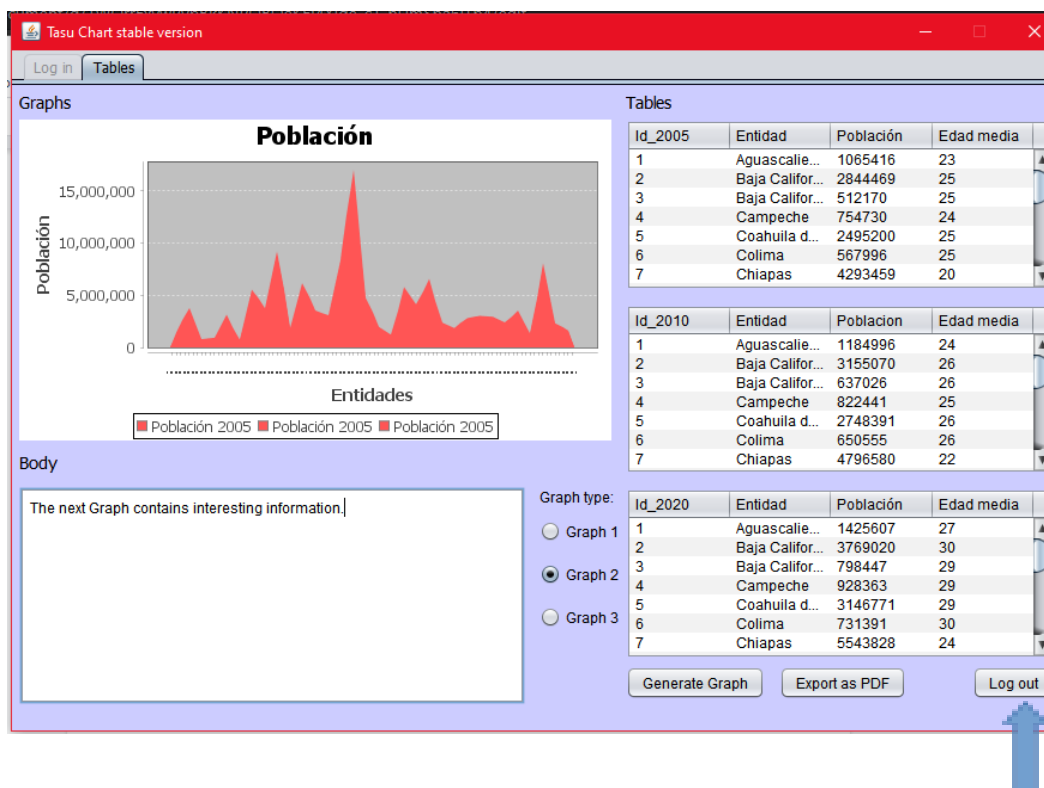

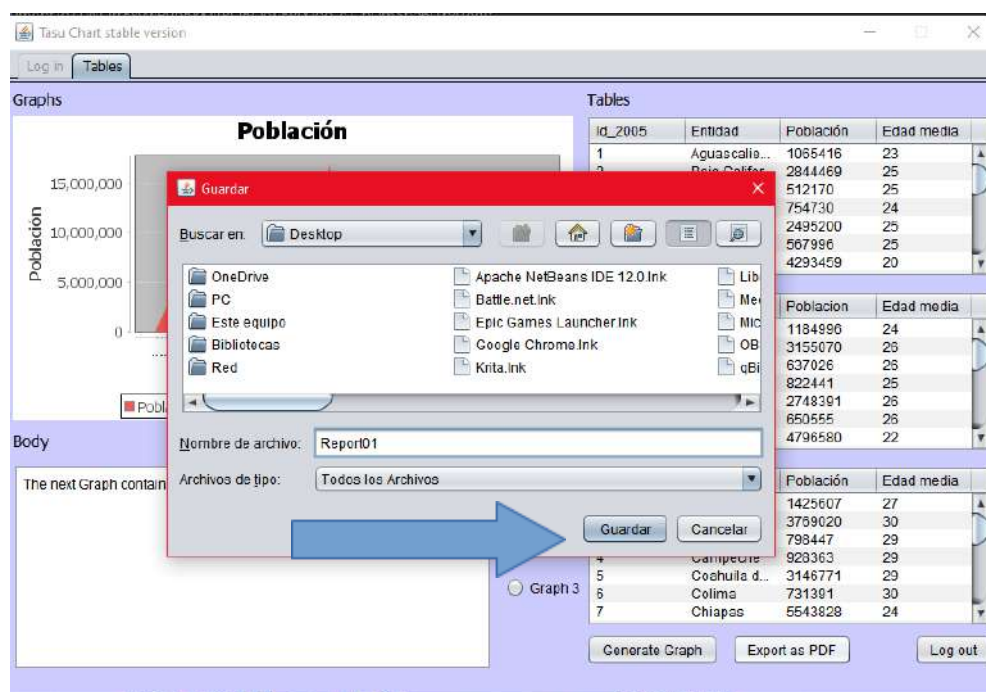

Just select the type of graph to generate from the data of the tables, then proceed to click on the button “Generate”. Additionally, you can add some text on the big blank area, this can be useful at the moment of exporting as a pdf.

3. Export as a PDF

Once you finish selecting the graph and adding some text, you only need to click the export button, then you will have to select the path and name to save the file. After that you are done and can now log out in case you are already finished.

Please check the technical manual in case you are looking for something else. Also you can contact me via nezzlu@gmail.com
